Ref. Richard Soan Roofing

Watersmead and Ichenor Church Projects

THE MARTIN SEWELL
BUILDING COMPANY

Richard Soans undertook 2 very high-end projects for us, in 2016 and 2017.

Ichenor church is a locally sensitive, historic and listed building where we re-roofed the church in 2016.

There was great attention to detail, and sensitivity to the build which was completed on budget, liaising with archeologists and architects for the preservation of the building.

The tiles sourced were from the same village! The match superb.

The trades liased well with us in regards to health and safety, planning and procedures, and were very pleasant to work with.

Watersmead in Steyning is a prestigious house. This project involved a re-roof including extensive tile hanging. Although not listed it is one of the older properties in Steyning.

Again the Soans team were sensitive to the project, completed on time with excellent workmanship and tile matching, and were a pleasure to work with.

If you need any further details please let me know.

We have forwarded record photos of the builds for you.

Yours

David Kuchanny
